Our goal is to harness the full potential of
ingredients and deliver their pure power to
body.

“NANO LIPO”
the nano liposomal supplement, crafted with
Kanehide Bio’s pride and expertise.

PQQ

(Pyrroloquinoline quinone)

PQQ is a water-soluble compound discovered in 1979, also known as a cofactor for oxidoreductase (coenzyme). It is contained in trace amounts in vegetables, fruits, tea, and fermented foods, and humans consume it daily through food and drink.

Additionally, poor growth was observed in mice lacking PQQ intake, leading to its consideration as a potential vitamin based on nutritional findings. In 2003, it garnered attention when research results from RIKEN were published in the English science journal "Nature".

PQQ is renowned for its high antioxidant activity and mitochondrial renewal effect. Furthermore, it has been studied for its effects on cognitive function, and a notification of “Food with Function Claims”(FFC) listing PQQ · 2Na as the involved components in cognitive function has been submitted."

**Product
Information**

- Contained approximately 20mg of PQQ (per 2 capsules).
- Enclosed PQQ in ultrafine particles by using our proprietary nano-technology*
- *Kanehide Bio is a pioneer company in nano-liposome technology for dietary supplements. (Patent: No.3858073, No.4634886)

[Date of release]	March, 2024	[Contents]	15.84g (260mg × 60 capsules)
[UPN Code]	4958349310013	[Best before]	2 years after date manufactured
[Case size mm]	132 × 170 × 230 (L × W × H mm)	[Size mm]	160 × 100 (L × W mm)
[Case weight]	0.6 kg	[Product weight]	22.5 g
[Units / Case]	20	[Classification]	PQQ-containing processed food
[Product figure]	In capsule (hard type)	[Ingredients]	Dextrin (made in Japan)、pyrroloquinoline quinon · 2Na/HPMC、soy lecitin、calcium phosphate
[Dosage]	2 capsules per day. Take with water or lukewarm water.	[Nutrition Facts] Per 2 capsules (528mg)	Energy 2.1kcal、Protein 0.02g、Fat 0.03g、 Carbohydrate 0.44g、Salt equivalent 0.001g
